# G4K *Pro* 1U Rack Build Guide
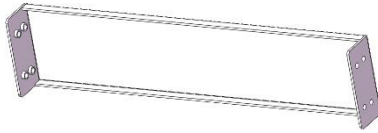

Package contents

A x 2 (ear panels)

**B x 1 (wide bracket)**

C x 1 (narrow bracket)

**D x 2 (side brackets, single fitting only)**

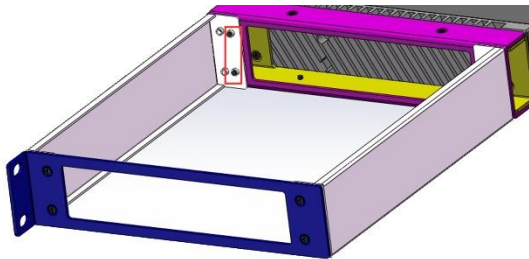

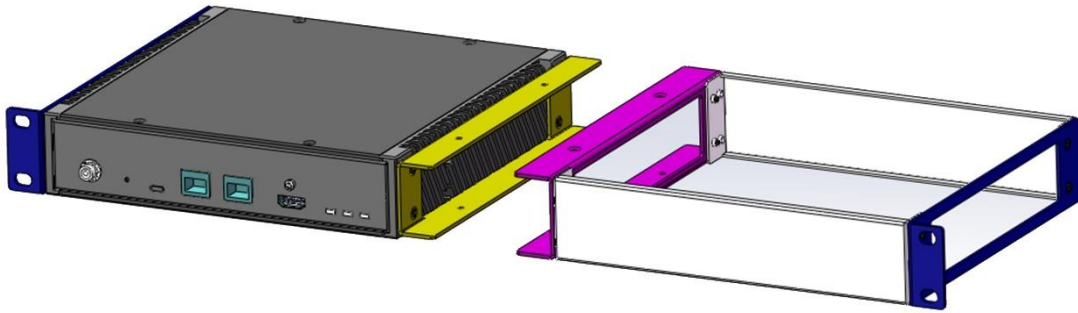

E x 20 (screws)

1. Dual G4K Pro Units Fitting

1) Use total **16** screws (E) to fix the panels (A) and brackets (B, C) onto the G4K Pro units respectively as shown above

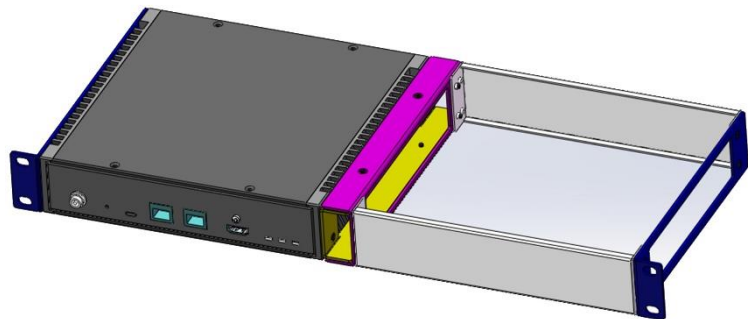

2) Introduce the joiner between the two G4K Pro units via bolting two brackets together using **4** screws (2 top and 2 bottom).

2. Single G4K Pro Unit Fitting

1) Use total **16** screws (E) to fix the panels (A) and brackets (B, C, D) onto the G4K Pro unit and form a dummy unit respectively as shown above.

2) Ensure to use two inner screw holes for building the dummy unit as shown left

3) Introduce the joiner between the G4K Pro unit and the dummy unit via bolting two brackets together using **4** screws (2 top and 2 bottom) as shown right.
