

SD-CSGM

Gooseneck Microphones

Overview

SD-CSGM gooseneck microphone is an innovative, stylish and ergonomically designed microphones, ideal for large conferencing room applications.

It offers easy and quick installation with SEADA conference microphone host units via the 4 pin CB connector. For ease of use, the gooseneck microphone comes with three different sizes: 38 and 42 cm in length and detachable design of condenser microphone capsule.

The design of the SD-CSGM microphone is highly anti-interference and is specially dedicated to avoiding strong electromagnetic waves from electronic products such as mobile phones.

Key Feature

- Designed to work with SEADA conference room system
- Power by the microphone unit
- Condenser microphone capsule
- Multi-length option
- Detachable Design
- Professional high-fide capacitor microphone
- Sensitive pickup
- Clear voice
- Highly anti-interference

Specifications

SD-XXX	
Cartridge	Condenser
Pattern	Cardioid
Sensitivity	-50dB/Pa
Frequency response	100Hz – 12KHz
SNR	80dB
Dynamic range	95dB
Harmonic distortion	<0.1%
Input impedance	2.2K
Connector	40mm
Weight	145/160g
Colour	Black

Models

Models	Mic Length (with Connector) mm
SD-CSGM-38	380
SD-CSGM-42	420
