

SD-WCSB

Wireless Microphone Host Units

Overview

The SD-WCSB microphone host unit is a high-quality call station with a sturdy metal base designed for use with SD-WCS wireless conference system. The SD-WCSB microphone units can be connected to SD-WCS wirelessly with up to 200 units. The 4-pin CB connector allows the convenient installation of different brands of microphones.

The SD-WCSB also features with multiple buttons for incorporating with the control unit, including speech ON/OFF, voting, volume adjustment and so on. With the on-unit display, user is also able to view information including unit status and timing on the microphone unit.

With a durable design and user-friendly interface, SD-WCSB provides an ideal solution for lecture halls and conference venues.
